

PATENT INTELLIGENCE

PatentCAM™ is an affordable patent monitoring, alerting, and knowledge management solution developed by IP Checkups, a boutique patent analytic and research firm.

PATENT MONITORING, ALERTING & MANAGEMENT

Whether tracking evolving patent landscapes, monitoring competitor filings for new innovations, or checking your own portfolio for third party patent citations, PatentCAM™ provides R&D, business development, licensing, and C-level executives easy access to the IP information needed to make informed business decisions.

PatentCAM is essential for large and small organizations to access and stay current on evolving technology landscapes.

IP Checkups' experienced patent analysts develop and run custom search strings across worldwide patent databases on a weekly basis.

Your company's scientific, business, and IP experts simply login to the secure, web-based interface enabling easy access to the patents relevant to your fields of interest.

PatentCAM enables key thought leaders to focus on analysis and interpretation, rather than searching, button pushing, and data capture.

Leave notes and analysis for colleagues regarding each patent or collection

Custom searching, sorting, and filtering options

The screenshot displays the PatentCAM web interface. On the left, a 'Collection tree' is visible, showing a hierarchy of patent collections under 'Thermal Storage'. The main area shows a list of patents with columns for Title, Pub. Number, Pub. Date, and Pub. Title. A detailed view of a patent is shown at the bottom, including the title 'Method for generating steam with concentrated solar radiation and water separation therein' and a detailed description of the method.

Collection tree enables you to place patents into determined categories

Patent detail viewer enables you to view more detailed information
